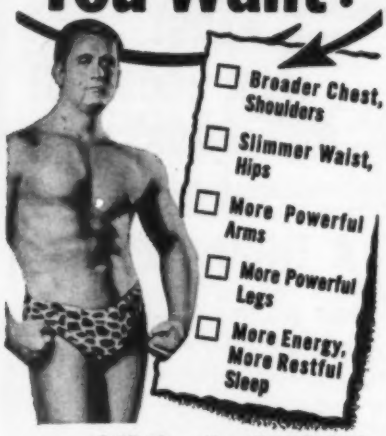
Check the Kind of Body You Want:



. . . and I'll Show You How EASILY You Can HAVE It!

JUST tell me, in coupon below, the kind of body you want—and I'll give it to you SO FAST your friends will be amazed! I'll show you how you can become a NEW MAN in just 15 minutes a day— in your own home – or it won't cost you a penny!

You wouldn't believe it, but I myself used to be a 97-lb. weakling. Fellows called me "Skinny." Girls made fun of me. THEN I discovered my marvelous new muscle-building system – "Dynamic-Tension." It turned me into such a specimen of MANHOOD that I won the title "THE WORLD'S MOST PERFECTLY DEVELOPED MAN."

"DYNAMIC-TENSION" – that's my secret! When you look in the mirror and see a healthy, husky fellow smiling back at you—then you'll realize how fast "Dynamic-Tension" GETS RESULTS. That's because it's the natural method you can practice in your own room – JUST 15 MINUTES A DAY – while your chest and shoulder muscles begin to swell . . . those arms and legs of yours bulge . . . and your whole body starts to feel "alive" – full of zip and go – INSIDE and OUT!

FREE My Valuable Illustrated 32-Page Book Net $1.00—Net 10¢—But FREE

Send NOW for my famous book showing how "Dynamic-Tension" can make you a new man. 32 pages, packed with photos, valuable advice, answers to vital questions. I'll send you a copy absolutely FREE if you rush coupon to me personally.

THAT LIL' OLD SHUMAKER T — Tim Shumaker's '18 Ford 'T'	Dec.	84
T MUCH TO OVERLOOK — Mike Groover's '23 Ford 'T'	Dec.	88

STEERING BOX

Flopped on its side, this Crosley steering box is the central part of a different (to say the least) front end arrangement. Flat plate anchored horizontally across the lower side of the frame rails forms the support for the unit. Heim-type joint at the apex of the "V" screws into a threaded section of tubing, providing easy and ready adjustment for caster changes. Remainder of front end package is of the "traditional" design. You can laugh if you want, but it works! ▪▪

SHOCK MOUNT

If you're building a street rod and are looking for an inexpensive shock absorber mount, give consideration to this type. From what we could learn, it came from the front end of a '49-'52 Ford pickup truck. Of forged steel, the mount bolts to the side of the frame rail, just like a stocker, and in the application shown, the upper end was heated with an acetylene torch and tilted forward slightly to achieve a desired angle. Its round shape lends itself to polishing and chroming, too. ▪▪
